

# Communication

- + **Fast charging electronics**, 1-3 h charging time, also while the ride and even while the BlueBike is working – 12 V and 230 V charging technology
- + **Cell phone and Navigation** also can be logged in parallel via Bluetooth
- + **Automatic acceptance of an incoming call** (the cell phone has to be logged in directly to the BlueBike)
- + **Redialing** (the cell phone has to be logged in directly to the BlueBike)
- + **Voice dialing** (if supported by the cell phone)
- + **Memory of all logged in Bluetooth devices** (max. 4 devices)
- + **Suitable for nearly all approved helmets** – also converting from one helmet to the other
- + **High wearing comfort** (professional ergonomic installation)
- + **Smart and inconspicuous optical appearance** (only the operating panel is visible)
- + **The keypad can be handled comfortable** – even with gloves
- + **BlueCenter (as an option) for BlueBikers with a 2-way-radio (LPD/PMR)**
- + **BlueTwin (as an option) for BlueBikers with an integrated stereo-equipment at the bike – transmission into 2 helmets** (all BlueBike features remain available)
- + **Factory-made installation or by authorized partners**
- + **3-Year-warranty – even for the battery**
- + **24h-support** – also by direct dialling from the helmet (update winter 12/13)  
The cell phone has to be logged in directly to the BlueBike.

- + **Automatic switching** from the intercommunication mode (Full duplex) to the TeamTalk mode (Simplex) for an endless number of BlueBikers – activated e.g. by the tour guide (Update winter 12/13)
- + **Battery operating time: 15h** full load

## Communication systems in Highend-Quality

### BlueBike

Communication of the premium-category

The BlueBike system is working on the Bluetooth®-platform, can be integrated in nearly all helmets, offers 4 parallel and fully automatic controlled functions like **cell phone, navigation, HiFi music** from e.g. MP3-player, cell phone, smartphone or from the navigation system as well as **intercommunication** with the pillion rider or with an endless number of BlueBikers in a visual range of about 700 m.

### BlueBike Solo

Info and Entertainment for Solo-riders

The BlueBike Solo system especially is for Solo riders and therefore **without intercommunication**. It offers 2 parallel and fully automatic controlled functions like **navigation** with logged in cell phone and **HiFi-music** e.g. from a MP3-player, cell phone, smartphone or from a navigation system.

### BlueTwin

Extra device for a stereo equipment installed in the bike

The system accessory BlueTwin is docking also a fix installed HiFi-stereo-equipment with radio, navigation etc. with the BlueBike comfort systems – wireless via Bluetooth®. The BlueTwin is transmitting the acoustics of your sound equipment into **two** BlueBike helmets in HiFi-quality directly to your ears – without any sound distortions. As long as one BlueBike helmet is logged in to the sound equipment, the BlueTwin is switching off the bord-loudspeakers automatically. All other BlueBike functions fully remain available.

### BlueCenter

Innovative combination of Bluetooth and 2-way-radio (LPD/PMR)

The BlueBike intercommunication system is working within a visual range of about 700m. Should you need a wider range, you need the BlueCenter as an interface between wireless Bluetooth communication and classic 2-way-radio handsets (LPD/PMR) – The BlueCenter fits in a tank bag or in a pocket. All BlueBike functions remain parallel available.

Precondition for the usability of all functions of the BlueBike system are devices with standardized Bluetooth®.

To make sure the compatibility of the navigation systems and the cell/smart phones, we gladly are prepared to provide advices – based on solid expertise and independent of brands.
